CT CONTRAST CONSENT

Patient Name: _____

IF YOU ARE PREGNANT OR THINK THAT YOU MAY BE PREGNANT, PLEASE INFORM THE FACILITY PERSONAL AT ONCE.

Your physician has requested that we perform a computerized tomography scan (CT) to obtain additional information. This is a diagnostic test that uses x-ray and a computer to produce images of internal body parts.

As part of your examination, we may need to inject you with a contrast solution containing iodine. This clear, colorless liquid is removed from your body by your kidneys and will not alter the appearance of your urine. It will show up on the image to provide important diagnostic information.

Soon after the injection you may experience a metallic taste and a warm sensation. You may feel some nausea. These feelings last only a short time.

Occasionally, minor allergic reactions occur in the form of itching, sneezing, hives, swelling, of the eyes or wheezing. These symptoms may require treatment with medication we have on hand. It is very important that you inform the technologist if you experience any of the conditions mentioned in this form.

Rarely, a more serious reaction will occur. Even though it is extremely rare, medical statistics indicate that fatality may occur from the injection of contrast. If you have had a reaction to a contrast injection previously or a history of asthma or other allergic condition, any history of diabetes or any kidney disorder, anemia or sickle cell anemia, if you are taking any Glucophage, are pregnant or breast feeding, you **MUST** inform the technologist.

The benefit of this exam is to assist your physician with making a diagnosis. There may be other imaging alternatives, however, your physician believes the CAT scan to be the best diagnostic test for you after evaluating your symptoms and medical conditions.

By my signature below, I hereby certify that I have fully read this consent, had it explained to me or have had it read to me. I have been given an opportunity to ask questions about my condition, alternative forms of treatment, the procedures to be used, and the risks and hazards involved. I understand its contents and have sufficient information to give this informed consent.
